

*Do you have a  
secret cat?*

40% of cat owners secretly feed a cat they don't own.  
Wild, stray, homeless... help us do the most for our **Community Cats**.

1. If she loves a pat and isn't shy, ask around the neighbourhood.  
She may just be dining out at your place!
2. Take her to your vet to be scanned for a microchip - she may be someone's missing family member.
3. A **Community Cat** can be a joy to have around, but when she arrives with kittens in tow she may not be so popular. Take the plunge and have her desexed - consider it a donation to cat welfare! Ask your vet today for more information.
