

Hi, my name is Mini

The whole package & more!

Female Domestic Short Hair Cat

Mini is a little fire cracker. She is only little, but has checked out all good to go. Both of her tear ducts are blocked with scar tissue from having been unwell as a kitten. This doesn't cause her any problems, but her new family may need to wipe her little eyes occasionally when she plays hard and makes lots of tears. She has a purr I can hear above the vacuum cleaner.....and it just motors on. Mini has some white flecks in her coat that set her apart from the other black cats around. Super unusual. She keeps up with the rough play of her brother and sister no problem! She plays happily around the dogs and runs confidently around the house no matter who is around or how busy it is. She enjoys a game of chase the toy dragged by the people, loves a ball chase....she is super affectionate, loves pats, smooches and nibbling on your fingers. She is delightful and fun.

Mini is desexed, microchipped flea and worm treated and her vaccinations are up to date.
