

Hi, my name is Dovey (Lab Release 21st June 2021)

I'm friendly!

Male Short-hair Guinea Pig

On the 21st June 2021, he's one of the 27 guinea pigs that were released into the care of Cavy Central having come from a laboratory. They were no longer needed and we are so pleased they were given the gift of freedom. These guinea pigs have not had any testing done on them, they are part of an ex-breeding herd and we had a mix of older piggies and some pups. These piggies are now able to touch grass and see the sky for the first time. This little would love to find a forever home where they can be pampered and give back love and affection. Over the past few months, they have been settling into Cavy Central and are now ready to find homes. If you would like to meet one please reach out and help us find the right homes for them.
